## Archiving COG-Endorsed Clinical Practice Guidelines

1. Clinical Practice Guidelines (CPGs) will be archived that:
  - have not been updated by their developer within 5 years of the date of their publication or
  - have been superseded by a more recently COG-endorsed CPG
2. Archived CPGs will be removed from the active part of the Supportive Care Guideline webpage and placed in the Archive section of the website where it will remain accessible.
3. The following notice will appear at the top of the first page of each COG-summary of archived CPG:  
“The following clinical practice guideline is no longer current and its recommendations may no longer be valid. This document is provided for historical purposes only.”
4. Each page of the archived CPG will have the watermark: “ARCHIVED”.
